10/18/70

Dear Jerry,

I'm sorry that your phone call today, which interested me very much, coincided with the overdue visit of a friend who was to counsel with me about a serious and costly problem with my pool (which I can neither afford nor, with the value of the pool, afford to ignore).

He had already been delayed by an unexpected funeral and his battery going dead because he forgot to turn his lights off at the cemetery, and he was anxious to leave because with the motor running, he feared running out of gas!

I wish I'd be able to hear more about the Gale show and Kaiser (of whose work I've formed a favorable opinion from the condensation, all I've seen).

I would appreciate the dub of the part of the tape in which Flamonde discusses the possibility of his doing a Ray book. I think, if it is not too much trouble, that it would be helpful if when you can you also make a dub for Gary. I think it may interest him also, and it would be better for him to have the thing as it was rather than paraphrased.

Again thanks,
